- ✓ I'm part of development communities

### TECH SKILLS & TOOLS

#### FRONT END

JAVASCRIPT HTML CSS  
REACT NEXT VUE  
TAILWINDCSS

#### MOBILE

REACT NATIVE EXPO

#### BACK END

NODE JS EXPRESS PYTHON  
FAST API

#### OTHERS

AWS APOLLO GRAPHQL  
SQL JEST HASURA GIT

### PROFESIONAL EXPERIENCE

#### Full Stack Software Developer

Vitazi USA | May 2024 - Present

Vitazi is an innovative startup leveraging AI to assist in the early detection of diabetes. I collaborate closely with the team to develop a robust web platform that facilitates seamless interaction between doctors and patients. Additionally, I work on the server-side API, ensuring smooth communication between the frontend, database, and business logic, optimizing the overall system's performance and reliability.

Stack: Python, FastAPI, AWS, React, NextJs, Vite, TailwindCSS

#### Full Stack Engineer

Encora CR - L2L USA | Nov 2023 - May 2024

Working for Encora Costa Rica, but for a client in the USA, called L2L, they have software for manufacturers, So far I was supporting the implementation of new features and solving issues

Stack: Python, Django, TypeScript, Javascript, Vue

#### Sr. Software Engineer

Parsley Health - USA | Jul 2021 - Ago 2023

I was part of Member Activation Team, I worked in impactful projects, including website redesign and activation metric improvements, we get a good results on activation metric. I took a more leading role, helping in investigations and leading them to implementation, taking design proposals and making an implementation proposal with tickets and estimates

Stack: React, TypeScript, GoLang, NodeJs and Microfrontend

#### Frontend Developer

YAIPAN - CR | Jan 2021 - Mar 2023

Build innovative solutions for municipalities in Costa Rica. As a front-end developer my main tasks were, design and code the munis.cr web-app, connect it with the various services of the integrated system that the company has. Ensuring a really good user experience, using modern technologies and patterns so that the platform would be the next step for local governments, (Independent consultant)

Stack: React, TypeScript, NextJs and NodeJs

#### Freelance - Novum

Jan 2019 - Present

- I started working on independent projects, react native, react, landing page, etc, have a look here: [www.isnovum.com](https://www.isnovum.com)

Stack: React, TypeScript, React Native, Expo, NextJs, NodeJs, GraphQL, Python

#### Software Developer

MEP - CR | May 2019 - Abr 2020

I built "SIGE" This system corresponds to my graduation project, it allows the automatic generation of the schedules of the Yanuro Quesada Educational Center. I worked at all stages of the development cycle, requirements

Stack: React, TypeScript, C#, .NET

## FEATURED PROFESSIONAL PROJECTS

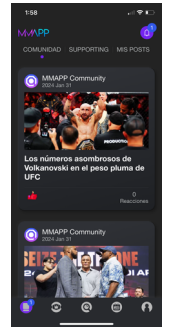

### MMAPP

Released date - Sep 2023

This is the biggest project I have developed as an independent professional, includes an SEO optimized landing page, an administrative panel, an application for Android and iOS, a headless CMS, a server for the database and a server for the hasura engine both in AWS, I was in charge of all the planning and development of this project, from taking a client's idea to its release into production, some important achievements: first place in google search in less than 1 month and most than 100 users in the first month

Stack: React, TypeScript, React Native, Expo, NextJs, NodeJs, GraphQL, Python

Want learn more, go here <https://mmappsite.com/>

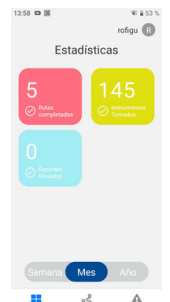

### BJG - ICE APP

Released date - Mar 2023

BJG is a company focused on IOT devices, they hired me to develop an application for the ICE Garabito electric power generation plant, this application was for a specific device with a code reader, the solution was to create an app with react native using native modules for Android to access the code reading hardware, the application helps employees make reports and maintenance routes

Stack: React, TypeScript, React Native CLI, GraphQL

You can find more projects here -> <https://marcomesen.com/>

## OTHER EXPERIENCES - BEFORE BECOME A DEV

### Bac Credomatic - Banking

Oct 2013 - Dec 2020
